

KNOW ABOUT P.R.P. THERAPY

Pain Management is a fast growing branch of Medical science. We are dealing with different types of "PAIN RELIEVING PROCEDURES" in our Impulse Pain Clinic. This Procedure are beneficial for patients suffered from chronic long standing Pain.

P.R.P. (Platelet Rich Plasma) is basically a part of our blood. It contain various "Growth Factors". This growth factors are helpful for Tissue regeneration in arthritis, chronic inflammation & various muscle or ligament injury. P.R.P. help to initiate body's natural healing process.

Following Conditions Improve with P.R.P.

- ✦ Osteo-Arthritis Knee
- ✦ Planter Fasciatis
- ✦ Tennis Elbow
- ✦ Sports injury like Ligament Sprain, Muscle Straine
- ✦ Partial Meniscus tear in Knee
- ✦ Rotater cuff injury in shoulder.

Growth Factors in Platelets

- ✦ Platelet Derived Growth Factor. (PGDF)
- ✦ Transforming Growth Factor (TGF)
- ✦ Vascular Endothelial Growth Factor (VEGF)
- ✦ Epidermal Growth Factor (EGF)
- ✦ Fibroblast Growth Factor (FGF)

EARLY INTERVENTION PRODUCES BETTER RESULTS

PRP Procedure Detail

In PRP Procedures, 20 to 40 ml of blood taken from patient's body. We collect in "Dr PRP (USA)" Kit. This blood then processed in PRP REFRIGERATED CENTRIFUGE Machine. Finally We get 4 to 5 ml of PRP, Which is immediately injected in recipient area of patient's body with help of U.S.G. or I.I.T.V. Machine.

- 100% safe with almost no side effect
- Reduce pain and reverses cartilage damage in joint

Session of Therapy : 3 to 5 sessions are required

Care to be taken by patients after P.R.P. procedures

- ✦ **Please do not take any analgesic treatment, it include following drugs**
 - Diclofenac (Voveran, Diclogesic, DAN-P, DAN-MR)
 - Ibuprofen (Brufen, Combiflam)
 - Paracetamol (Metacin, Crocin, Dolo)
 - Or any drug which you take for pain relief
- ✦ **Patient can take only pain killer medicine given by us.**
- ✦ **Take rest for 2 days.**
- ✦ **Try to do routine work for first 7 days.**
